

Apps for Aging

Using iPads to Benefit Older Adults

Date: Thursday, May 16, 2013

Time: 3:30pm – 5pm ET | **Registration Fee:** \$59

Webinar Instructor: Therese Willkomm, Ph.D.

Sponsored by Assistive Technology in New Hampshire (ATinNH)

Webinar Description:

The iPad is having a profound impact on the lives of older adults, family members, and care providers. This webinar will discuss an assortment of iPad apps and accessories which can benefit older adults, including apps for low vision; reading and writing; hearing impairments; memory aids; speaking difficulties; reducing anxiety and depression; controlling home appliances; recording heart rate, blood pressure, food intake, exercise, and sleep patterns; and real-time video chats with loved ones and service providers.

Participants will also learn ways that the iPad can be quickly adapted to accommodate for a variety of vision, communication, or physical impairments.

Who Should Attend:

Accessibility professionals, ADA administrators, assistive technology specialists, family members, older adult consumers, rehabilitation engineers, vocational rehabilitation counselors, and related service providers are encouraged to attend.

Technical Requirements:

This training is accessed from your computer via a

high speed Internet connection and includes visual and audio components. Please see the Webinar FAQs online for full details.
